Hi Dan, that's the same conversation I had with Chief O'Keefe and Nancy, and they were in agreement. That's what we responded with.

Thanks for the help!

Subject: RE: New Open Records Request #5673

Scott:

I read the request. We haven't ever been involved in the solicitation or acquisition of facial recognition software. It just happens that Lumen has that feature available (as did coplink) but it was never part of an RFP.

Dan

Chiefs, Aleta, and Scott,

Please see this CORA request. I think it is best for PD and IT to handle. I think perhaps Scott could provide one coordinated response, but will leave it to you all to determine how best to handle.

Thanks,

3 ways technology will make police departments more agile

By PoliceOne BrandFocus Staff

Police departments across the country are leveraging new technologies made possible by the cloud to improve the way they protect and serve. These advanced tools are improving

the speed of investigations, storing data securely and quickly combing databases for relevant information that may have taken much longer to gather in years past.

In this article, learn how the cloud-based tools of the future are changing the face of law enforcement:

- Artificial intelligence, or AI, helps police search massive amounts of data to gather actionable information more efficiently.
- Secure cloud storage and management helps police analyze video from body-worn cameras, dash cams, surveillance footage and even citizen-generated video.
- Cloud-based CAD and RMS platforms provide real-time intel to boost situational awareness and enhance officer safety.

Mr. Sibek:

Lt. Parvin and Lt. Dufour both contacted me about your contact with them. You've e-mailed several individuals with APD. You e-mailed me in July, August and in September and we have had at least one phone conversation. I'm going to be very blunt with you. I don't know how much that you know about sales but being annoying won't get you anywhere and you have become annoying. I've researched FaceFirst and it appears to be a good product but due to your sales tactics, I'm not at all interested in a demo. Please take all e-mail addresses @auroragov.org off of your mailing list.

Subject: Facial Recognition Follow Up

Hi Lieutenant:

I was told to speak with you about our facial recognition technology. We serve 80 law enforcement agencies and would like to show you why.

FYI below are 2 testimonials we received from our clients:

1: I just wanted to send a positive note on two events regarding the new Face First program. Three tablets were upgraded with the test program last week. The very next day we used it on our first call. The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large.

2: Just wanted to drop you a note on how the facial recognition worked yesterday. Right after our weekly investigations' meeting I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her we knew she was lying about her identity and were running out of detention time. I sent you the photo of her and within a couple of minutes we had her identified and learned she was a parolee at large. She was arrested for the warrant and identity theft...very helpful tool.

Unfortunately we were recently told by Brett Parvin to stop contacting Aurora PD, that you are not interested, so unfortunately we will not be able to demo this technology.

If anything changes, let us know. Many law enforcement agencies are using this technology as a layer of safety and security for their officers.

Regards,

Paul

Subject: Facial Recognition Demo Request

We received these testimonials from clients and I thought you might be interested..

Our contact at ARJIS sent us this email yesterday, which demonstrates the power of the platform beyond just traffic stops:

Scenario #1: "The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large."

Scenario #2: "Right after our weekly investigations' meeting, I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her. We knew she was lying about her identity and were running out of detention time. Within a couple of minutes we had her identified and learned she was a parolee at large."

We would like to demonstrate these capabilities to you and your staff, please let me know if you are interested or could refer me to the appropriate person.

Subject: FW: New Open Records Request #5673
Importance: High

Chiefs, Aleta, and Scott,

Please see this CORA request. I think it is best for PD and IT to handle. I think perhaps Scott could provide one coordinated response, but will leave it to you all to determine how best to handle.

Thanks,

Jason Batchelor

No sweat. He has continually bugged several people and they all refer him to me, including the Chiefs. Parvin has asked him several times to stop contacting him. My guess is that he has a spam e-mail set up that blasts out once a month.....

Mr. Sibek:

Lt. Parvin and Lt. Dufour both contacted me about your contact with them. You've e-mailed several individuals with APD. You e-mailed me in July, August and in September and we have had at least one phone conversation. I'm going to be very blunt with you. I don't know how much that you know about sales but being annoying won't get you anywhere and you have become annoying. I've researched FaceFirst and it appears to be a good product but due to your sales tactics, I'm not at all interested in a demo. Please take all e-mail addresses @auroragov.org off of your mailing list.

Subject: Facial Recognition Follow Up

Hi Lieutenant:

I was told to speak with you about our facial recognition technology. We serve 80 law enforcement agencies and would like to show you why.

FYI below are 2 testimonials we received from our clients:

1: I just wanted to send a positive note on two events regarding the new Face First program. Three tablets were upgraded with the test program last week. The very next day we used it on our first call. The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large.

2: Just wanted to drop you a note on how the facial recognition worked yesterday. Right after our weekly investigations' meeting I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her we knew she was lying about her identity and were running out of detention time. I sent you the photo of her and within a couple of minutes we had her identified and learned she was a parolee at large. She was arrested for the warrant and identity theft...very helpful tool.

Unfortunately we were recently told by Brett Parvin to stop contacting Aurora PD, that you are not interested, so unfortunately we will not be able to demo this technology.

If anything changes, let us know. Many law enforcement agencies are using this technology as a layer of safety and security for their officers.

Regards,

Paul

Subject: Facial Recognition Demo Request

We received these testimonials from clients and I thought you might be interested..

Our contact at ARJIS sent us this email yesterday, which demonstrates the power of the platform beyond just traffic stops:

Scenario #1: "The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large."

Scenario #2: "Right after our weekly investigations' meeting, I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her. We knew she was lying about her identity and were running out of detention time. Within a couple of minutes we had her identified and learned she was a parolee at large."

We would like to demonstrate these capabilities to you and your staff, please let me know if you are interested or could refer me to the appropriate person.

Facial Recognition Software for Fighting Crime: To Ban or Not to Ban

Today, law enforcement has a wide variety of technology at their disposal to help investigate, and sometimes even thwart a crime. In particular, Facial Recognition Software (FRS) has been getting a lot of attention as of late due to recent bans.

Why is the technology being banned – and what can be done to make the most of the tech while staying in the bounds of privacy?

Read more from Ed Wallace, retired First Grade Detective of the NYPD.

To: Municipal Records
Subject: Colorado Public Records Law Request: Facial Recognition - Aurora (CO)

Aurora Police Department
CPR Office
15001 East Alameda Parkway
Aurora, CO 80012

July 2, 2019

To Whom It May Concern:

Pursuant to the Colorado Public Records Law, I hereby request the following records:

Records and materials related to the solicitation, acquisition, and use of face recognition technology and related software and services.

This software or services may be provided by Rekognition, Face++, and FaceFirst; this request is applicable to these and any other company providing facial recognition services under consideration or contract with this agency.

Responsive materials include but are not limited to:

- Agreements: contracts (including non-disclosure agreements), licensing agreements, nondisclosure agreements
- Bid records: Requests For Proposal (or equivalent calls for bids), sole source or limited source justification and approval documentation, documentation of selection, and other materials generated in the consideration and selection of the technology in question
- Company relations and communications: records related to meetings or follow-up actions with any vendors, companies, or other private entities marketing face recognition to this agency for immigration, intelligence, law enforcement, or other use.
- Financial records: purchase orders, invoices, and other memoranda and documentation.
- Marketing records: All marketing materials - unsolicited, requested, or otherwise - acquired from vendors of face recognition technology
- Policy records: any policy directives, guidance documents, memoranda, training materials, or similar records governing the use of face recognition technology for immigration, law enforcement, or other purposes. Any memoranda of understanding between this agency and other agencies to share data, access remote systems or other forms of information sharing with external agencies.
- Training records: training material governing the use, sharing, or access to any related data related to or collected by the face recognition software/technology, including the legal standard that is required before using the technology. Documents, should they exist, about training for bias in the use of facial recognition technology.
- Use and function records: Materials that describe the function of the software considered or in use by this agency, including emails, handouts, PowerPoint presentations, advertisements, or specification documents.
- Validation and accuracy: Records, reports, audits, and other documents sufficient to describe validation, accuracy, reliability, and policy compliance of the system.

Please limit the search to records produced from January 1, 2017 – present. Please include in your search as responsive records: communications, memorandums, background papers, meeting minutes, email exchanges, or presentation materials. If your office has questions about this request, please feel free to direct them to the address associated with this request or call the MuckRock office at 617-299-1832.

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 3 business days, as the statute requires.

Sincerely,

Freddy Martinez

Subject: For GAC Use and Distribution: Release of the Face Recognition Policy Development Template For Use In Criminal Intelligence and Investigative Activities

~ ~ ~ ~ ~ Please accept the following message on behalf of Kevin Bowling, J.D., Chairman, Global Advisory Committee (GAC), and Court Administrator, 20th Circuit Court, Michigan. ~ ~ ~ ~ ~

GAC Members and Partners-

I am pleased to inform you that the [Face Recognition Policy Development Template For Use In Criminal Intelligence and Investigative Activities](#) (attached) has now been released and is available for your use and dissemination. As a Global Advisory Committee (GAC) member, you are the **voice of the GAC and a steward of Global initiatives**. As such, we ask you to please support Global outreach efforts by quickly **spreading the word** and promulgating this timely and critical deliverable to your association members and constituents. Currently, face recognition systems are being purchased, implemented, and accessed without adequate privacy, civil rights, and civil liberties (P/CRCL) protections in place. ***It is vital that every law***

enforcement entity, fusion center, and public safety agency that uses face recognition technology have this important P/CRCL resource in hand. To assist you in fulfilling this charge, we've provided a purpose and background information on the deliverable below my signature line. If you have any questions about this resource or need additional information or transmission language to facilitate these outreach efforts, please contact Christina Abernathy, cabernathy@iir.com.

As Chairman and colleague, please accept my personal thanks for taking time out of your busy schedules to help promote this important resource to the justice field.

Thank you!

Sincerely,

Kevin Bowling, JD
GAC Chair

Court Administrator, 20th Circuit & Ottawa County Probate Courts

~ ~ ~ ~ ~ Deliverable Purpose and Background ~ ~ ~ ~ ~

Face Recognition Policy Development Template For Use in Criminal Intelligence and Investigative Activities

- **Purpose:** The purpose of this deliverable is to provide guidance to state, local, tribal, and territorial (SLTT) law enforcement entities, fusion centers, and other public safety agencies on developing privacy, civil rights, and civil liberties (P/CRCL) policies and procedures on the use of face recognition tools in intelligence and investigative activities. The target audience for this resource are entities that either operate/own their own face recognition program or that have authorized access to and use of a face recognition system. The policy template also includes provisions that address mobile face recognition and analysis on live video. It features an overview of face recognition technology, guidance on how to utilize the template, a resource list for further reading, a glossary of terms, listing of related federal laws, and a sample policy for entity customization. This resource was modeled after other Global policy templates, such as the [*License Plate Reader Policy Development Template for Use in Intelligence and Investigative Activities*](#) and the [*Fusion Center Privacy Policy Development Template*](#), as well as the guidance contained in [*Developing a Policy on the Use of Social Media in Intelligence and Investigative Activities: Guidance and Recommendations*](#). The provisions suggested are designed to be incorporated into an entity's general operational policies and day-to-day operations.
- **Project Background:** Face recognition technology can be a valuable investigative tool to detect and prevent criminal activity; reduce an imminent threat to health or safety; protect the public; help identify persons unable to identify themselves, or deceased persons; and improve security and officer safety. As the use of face recognition tools in intelligence and investigative activities expands, it is necessary for entities to ensure that policies are developed and implemented that incorporate P/CRCL protections into the use of such technology. Since images of individual persons are the source of face recognition information, there are higher expectations for the protection of P/CRCL. Failure to adopt and implement appropriate policies and

procedures can result in serious consequences both for the individuals involved and the agencies that use the technology.

To help address these concerns, a Face Recognition Policy Task Team was established, comprised of SLT and federal practitioners, as well as subject matter experts (SMEs) experienced in law enforcement use of face recognition and knowledgeable in the areas of P/CRL and face recognition technology. Task Team members included:

1. Face Recognition Policy Group Members

Chair: **Dawn Diedrich**, Director, Office of Privacy and Compliance, Georgia Bureau of Investigation

Federal Partners

- U.S. Department of Homeland Security (DHS)
 - Office of Intelligence and Analysis, State, Local, Tribal, and Territorial (SLTT) Partner Engagement—**Kevin Saupp**, Director of State and Local Partner Engagement, and **Susan Bower**, Program Manager
 - Privacy Office—**Scott Mathews**, Senior Privacy Analyst for Intelligence
 - Office for Civil Rights and Civil Liberties—**Ayn Crawley**, Director, Civil Rights and Civil Liberties Institute, and **David Demski**, Technology Analyst
 - Homeland Security Information Network (HSIN)—**Maria Petrakis**, Policy Manager
 - Office of Biometric Identity Management (OBIM), part of the National Protection and Programs Directorate—**Anne May**, Program and Management Analyst, and **Brian Pittack**, Program and Management Analyst
 - U.S. Customs and Border Protection, Biometric Exit program—**Brandon Fauquet**, Manager and Program Analyst, Planning, Program Analysis, and Evaluation, Office of Field Operations
- U.S. Department of Justice (DOJ)
 - Bureau of Justice Assistance (BJA), Office of Justice Programs (OJP), DOJ—**John Markovic**, Senior Policy Advisor, Justice Information Sharing Team
 - U.S. Drug Enforcement Administration (DEA)
 - **George Johnson III**, Investigative Tech
 - **Bob Montgomery**, Technical Director, All Native Group
 - **Spring Williams**, Unit Chief, Office of Investigative Technology
 - Federal Bureau of Investigation (FBI)
 - FBI Criminal Justice Information Services (CJIS) Division
 - FBI Terrorist Screening Center (TSC)
 - FBI Office of General Counsel/Privacy and Civil Liberties Unit
 - Office of Privacy and Civil Liberties (OPCL)—**Beth Zelman**, Attorney Advisor
 - Office of the Director for National Intelligence (ODNI), Office of Civil Liberties, Privacy, and Transparency—**Eva Kleederman**, Deputy Chief, and **Brian Ince**, Senior Assistant Civil Liberties, Privacy, and Transparency Officer
- ODNI, Office of Partner Engagement, Information Sharing Environment (PE-ISE)—**Frank Pawlowski**, Senior Law Enforcement Advisor

Biometric Privacy SME

- **Pam Dixon**, Executive Director, World Privacy Forum and member of the Privacy and Policy Expert Group, Biometrics Institute

Fusion Centers

- **Lieutenant Ron Fisher** and **Eric Diggs**, Maryland Coordination and Analysis Center
- **Jimmy Gianato**, Director, Division of Homeland Security and Emergency Management, West Virginia, West Virginia Intelligence Fusion Center

State- and Local-Level Facial Recognition Practitioners

- **Commanding Officer Inspector Joseph Courtesis** and **Sergeant Edwin Coello**, Facial Recognition Program, New York Police Department Real Time Crime Center

Subject: Facial Recognition Demo Request

We received these testimonials from clients and I thought you might be interested..

Our contact at ARJIS sent us this email yesterday, which demonstrates the power of the platform beyond just traffic stops:

Scenario #1: "The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large."

Scenario #2: "Right after our weekly investigations' meeting, I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her. We knew she was lying about her identity and were running out of detention time. Within a couple of minutes we had her identified and learned she was a parolee at large."

We would like to demonstrate these capabilities to you and your staff, please let me know if you are interested or could refer me to the appropriate person.

Subject:

Policy Copy Request

Folks,

I serve as your representative on the IACP CJIS Committee. We have just formed a short term task force to provide information that will help agency CEOs and teams when they seek to purchase FR technology AND to develop a model policy for later international application. Colorado is far ahead of most states in this area and most all CISC Member Agencies understand that it is vital to have a FR use policy in place *before* using the technology (if your agency does not have one, there is a model policy on the CISC website you can use to get started... www.co-cisc.org).

As a result, I have a request:

For those of you who are willing (and authorized to do so), would you be kind enough to send me a current copy of your Facial Recognition Technology use policies to share with my fellow task force members? These will help us make quality recommendations toward the development of an internationally acceptable model policy.

Thank you in advance for your help!

Subject: Facial Recognition Use Case and Success Stories (Mission Accomplished)

REQUEST for Assistance:

I presently sit on an IACP Facial Recognition Task force representing the CISC. We need short success stories describing how CO peace officers use Facial Recognition technology to good effect.

Every case you can describe and send to me by Friday, October 26, 2018, at 1500 is important!

We particularly need cases where FR helped exonerate or clear an innocent person. Names of those involved are not needed, but the submitting Officer and Agency names are.

Many thanks in advance for your help!

Subject: Face recognition at IACP

Nicholas,

I noticed that you're headed to IACP this year and wanted to personally invite you to stop by the FaceFirst booth (#2285).

I wouldn't want you to miss out on the opportunity to see Field-IQ, our newly upgraded mobile face recognition system for law enforcement. With Field-IQ, patrol officers can:

- Instantly identify potential threats in the field
- Save hours a week by instantly identifying suspects
- Benefit from an added layer of protection

Since our booth experienced high traffic last year, would you like to schedule a personalized demo?

Let me know,

Regards,

Paul

Subject: Facial Recognition Demo Request

FaceFirst is the leading provider of facial recognition technology to law enforcement and we recently received testimonials from our clients, here are 2 for your review.

1: I just wanted to send a positive note on two events regarding the new Face First program. Three tablets were upgraded with the test program last week. The very next day we used it on our first call. The residence we were in was a known flop house with several occupants. One male ran out the back into the garage to hide but was located and detained. The male was photographed and entered into the TACIDS system. A 99.97% match was provided on the male. A records check of the name and DOB provided the male had an active felony warrant and was a parolee at large.

2: Just wanted to drop you a note on how the facial recognition worked yesterday. Right after our weekly investigations' meeting I was assisting other detectives on a follow up of a kidnapping / robbery. We ended up at the suspect's house and contacted numerous people. I contacted two people who were not involved but were in the suspect's apartment. One had ID and had a PAL warrant and was immediately arrested. The other person, a female, had no ID and gave the name of a real person in AZ. It was obvious this female had been arrested before but the record's check showed no hits of a criminal record. At this point in the investigation she was not a suspect in the kidnapping and we did not have anything else on her....we knew she was lying about her identity and were running out of detention time. I sent you the photo of her and within a couple of minutes we had her identified and learned she was a parolee at large. She was arrested for the warrant and identity theft...very helpful tool.

We would like to offer you a 45 minute WebEx demonstration and show you the capabilities of this remarkable technology and why so many law enforcement agencies are using facial recognition as a layer of safety and security for their officers in the field.

Regards,

Paul

Subject: Webinar Thursday

We have a few open spots left before Thursday's webinar is full. [Register now](#) to reserve your spot.

Product in and money out! Law enforcement agencies are often challenged by the degradation of communities they serve brought on by organized crime groups. These groups use vehicles to traffic guns, humans, narcotics and currency and the unidentified faces of victims and offenders are often caught in various types of imagery. These vehicles and faces are leads that need to be resolved.

Join retired NYPD Detective Tom Joyce, Vice President of Business Development for Vigilant Solutions, as he discusses how vehicle location data and facial recognition technology can help disrupt these organized crime groups and have an effect on the local crime rates in the communities they operate.

REGISTER FOR THE WEBINAR NOW

Looking forward to you joining us!

Heather Richardson
Partner Marketing Manager
www.vigilantsolutions.com

P.S. If you can't make it to the webinar download the [LPR Beyond the Lens eBook](#) to learn how high tech crime fighters use vehicle location data.

Subject: Why law enforcement agencies trust FaceFirst face recognition software

Hi Nicholas

I thought I'd try one more time in case you missed my previous calls or emails. Here's why law enforcement agencies like Aurora Police Department trust FaceFirst:

MOBILE FACE RECOGNITION

- instantly identify persons of interest while on patrol
- break through language barriers
- stop wasting hours transporting individuals for processing
- instantly discover warrants and criminal history
- prevent false arrests, minimizing lawsuits

BIOMETRIC SURVEILLANCE

- know when suspicious individuals enter a station
- ensure that only authorized personnel enter sensitive areas
- customize alerts and notifications to select team members
- forensic video analysis from surveillance footage

WHY FACEFIRST?

- over 10M hours of operational experience
- trusted by organizations in hundreds of locations across 10+ countries
- designed to protect personal privacy even during a data breach

May I schedule a product demonstration for you?

Best,

Regards,

Paul
